May 30th, 2022**Attn: Quintoandar****Mrs. Mariana Polidorio Machado**
Public Policy Director

At DLG, we are honoured to provide the following legal service proposal, after holding a very productive conference and message exchange with the Client's Public Policy Director in which we got a better understanding of Quintoandar's business model and a closer approach towards your ambitious targets for their business in Mexico City.

1. Relevant experience and credentials of the firm.

DLG is a legal and policy consulting firm that specializes in the interaction of the public and private sector. Whether on areas where enterprises are heavy regulated and in constant interaction with the government (finance, energy, e-commerce, Fintech, pharmaceutical) or when the government is the counterpart, partner or relevant stakeholder in our clients business (infrastructure, public project finance, Public-Private Projects (PPP's) and other tech joint ventures), notwithstanding our considerable portfolio of clients also include public entities from federal and local government. The firm's motto and vision is to find the best regulatory, legal and policy solution to help our clients execute their business involving government engagement.

Our firm's partners and staff are mainly former public servants that spent over 2 decades occupying some of the highest legal positions in the federal government in Mexico. Even though such experience covers relevant fields of the regulatory and policy landscape such as finance, energy, real estate, tax, infrastructure, international law, among others, the following lines will outline and highlight the relevant experience we believe the Client will appreciate. Please feel free to access our website <https://en.dlgabogados.mx/> for further information about the firm and its staff.

The firm. Being a relatively new incorporated firm (3 years) we have already managed to retain a relevant client portfolio which includes: three major banks (top 5), one federal development bank, one Federal Ministry, three local states governments, five major tech apps (social media platforms, housing, rides and delivery apps), a major payment processing network, payment system providers, two of the main financial international organizations, one Energy Investment

fund, electricity plant developer, national appliance store, construction developer, listed telecommunication company, among others.

The tasks undertaken and policy services that DLG provides to its clients go form a range of conventional services in their day to day operations and product development, such as policy risk assessment, regulatory monitoring, direct engagement with stakeholders; to deeper and more substantial tasks such as innovative law and regulation creation and negotiation process, public-private contract negotiation and policy building.

The staff and partners. DLG is committed to capitalize our knowledge and 25 years of experience in favor of our clients' interests, in order to build bridges between the public and the private sectors to achieve their respective goals.

As stated above, our partners occupied paramount positions within the government, developing professional relationships with current decision makers, based on mutual respect for trajectory and legal minds, among those positions are:

- Attorney General for Tax and Financial matters. Ministry of Finance. (Legal vice minister)
- Attorney General. Ministry of Foreign Affairs.
- Vice Minister of Legal Affairs and Human Rights. Ministry of the Interior.
- Deputy Fiscal Attorney General of the Federation (in the areas of Legislation and Consultation, Financial Affairs and Litigation). Ministry of Finance.
- Legal Affairs General Director at the Underministry of Expenditure. Ministry of Finance.
- General Director for Legislation and Consultation, State Owned Enterprises and Public Funds. Ministry of Finance.
- Representatives for Mexico as negotiators of several International Agreements such as USMCA, CPTPP, EUMFTA among others. Delegate for the Mexican Government before the OECD for FATFA and the Working Party for State Ownership and Privatization Practices.

We currently enjoy an outstanding reputation and are on excellent terms with all political parties across the alley, we currently advise or have business relations with federal government and other local entities from different political parties.

2. Proposed scope of work.

The challenges Quintoandar will face during its launch can be unpredictable. We have some intel as to the possibility of upcoming regulation impact on real estate agents registry, however many

issues need to be closely and continuously monitored, such as tax, financial, AML, notary public, public registry, urban development, digital consumer protection, and many other areas in all of which we will provide a broad range of services:

- **Monitoring:** DLG provides and specializes in monitoring legislative and regulatory alerts in the areas described above. At the federal and local level (32 states). We not only review all public sources (gazettes and official diaries) but also all relevant news outlet, social media and then run “gossip” confirmations with our extensive network of stakeholders.
- **Policy and regulatory analysis.** Every time that our Client or we detect an issue noteworthy of attention due to the impact it may have upon Quintoandar’s interests, we run a brief executive bullet note for decision makers to be aware of its content, our suggestion of course of action, and an implementation route. In the meantime, we also perform a deeper analysis for direct engagement and presentations for all kind of stakeholders depending on sector, profile and decision-making level.
- **Direct engagement on negotiations and working groups.** We deploy all of our resources and experience from years of direct negotiations with legislators, public servants at the highest level and business stakeholders. We follow Client’s instructions on targets, objectives, “no-go” areas, as well as to whether we assist meetings with them, on their behalf or not at all. Our main task is that the Client’s goals are achieved with the best political outcome and lowest friction with government, considering the continuous interaction.
- **Academic involvement.** It has been our experience that some ideas are better issued through academia. Usually hired through Associations, in this case, Real Estate chambers of commerce, etc., we have accompanied Clients in commissioning studies from well known universities or NGO’s in order to have an outside opinion on regulatory or market implication issues that may be of our interest to later on use them before decision makers. This also applies to monitoring or participating in panels as experts in areas where our Client’s interest might be impacted. The founding partners also hold or have held important positions in renown Mexico City universities (ITAM, TEC, CIDE)

The services will be rendered continuously on the monitoring side, but also will be triggered by Client’s necessities. We pride ourselves on the fact that the team is always at the beck and call of the Client. We also work under a close proximity model in which we like to hold meetings with the Client’s relevant business areas (product, operations, sales) specially at the beginning, so we help Policy area navigate internal obstacles within the company and enjoy the best communication possible in our solution finding process.

Furthermore, at the request of the Client, we sit in internal and external meetings where our presence might be of assistance whether to explain policy and regulatory perspectives or simply to better understand other areas and stakeholders' concerns.

Other services. As explained before, our comparative distinction from other policy consultants is our legal and regulatory background. Not only do our solutions and services are carefully focused on being legally viable, but we can also provide all legal services applicable to digital economy, on corporate, finance, regulatory, compliance, transactional, labor, tax and other aspects of the law. If at any point the Client wishes to further expand the scope of services contained herein, to include legal services we would be glad to issue the correspondent proposal.

3. Proposed fees.

At DLG, we strongly believe in having the necessary flexibility to tailor our fee structure to our Clients needs and preferences. In that regard, taking into consideration that the Client will launch their business in an abroad territory and all the attention and unexpected issues it requires, DLG suggests a flat fee that allows full and agile collaboration in the broad scope of work described. Therefore, we suggest a 12 month contract for a monthly fixed fee \$7,500 (seven thousand and five hundred dollars) VAT not included. The fee is calculated through a monthly estimation of staff hours that would be destined to Quintoandar's business, that is (10-12 partner hours, 10-18 Sr. Associate and 16-20 Jr. Associate), with the appropriate discount for the flat fee scheme.

We also offer a flexible arrangement in which we may run quarterly reviews to evaluate the workload and if necessary, adjust the established flat fee. For that purpose, DLG, at the request of the Client, can present activity reports.

For the Client's reference, the DLG hourly rates table for 2022 is the following (VAT not included):

Lawyer	Fees
Partner	500 USD
Sr. Associate	300 USD
Jr. Associate	230 USD
Law Clerk	110 USD

4. Assurances.

The undersigned, on behalf of the firm, confirms and acknowledges before AI that the eventual representation of the Client by DLG Abogados in this matter will not give rise to any conflict of interest with the government nor with any other person.

Furthermore, we guarantee our Client that all legal services performed by DLG Abogados are protected by Client-attorney privilege under applicable law and the firm ensures such protection by the mandatory compliance of all of its members of the code of conduct available for consultation at our website www.dlgabogados.mx. However, the firm is aware of internal processes of information handling and therefore is completely open to collaborate if the Client requests signatures of NDA's.

As for Conflicts of Interest, DLG is obliged to disclose any circumstance that may hinder its ability to provide their services at the best of our capacities and cloud our unbiased judgement. For that matter, we can gladly say that at the moment we hold no conflict of interest by representing a competitor or any other agent related with the Client's business. However, if any conflict arose from information obtained further on, we would immediately disclose it before the Client, offering a solution for its handling if possible, before continuing the rendering of services.

We sincerely hope this proposal is in accordance with your needs and expectations and remain at your service for any questions or follow up.

Kind Regards

Jorge Gonzalez Gallastegui

DLG
